

Where LLM Fits Into Your Land Use Plans

LLM offers a unique full-service approach to natural resource management. LLM can provide many services, replacing multiple contracts a landowner would traditionally have to seek. LLM focuses on some of the most endangered habitats in the pacific northwest, including oak savanna, oak woodland, and wetlands. The Willamette Valley is in danger of losing these critical and historical habitats especially on private property. Some landowners may not realize the importance of what they have, or the environmental impact of their land use decisions. LLM helps landowners make informed decisions that are best for them and the environment.

LLM is here to help...

Lina Land Management LLC (LLM) specializes in helping landowners manage their land for sustainable natural resources, wildlife habitat, profitability, and aesthetics.

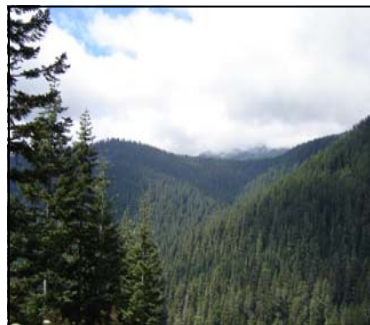

Habitat Restoration

Wildlife of all kinds need habitat to survive. LLM restores and creates habitat that has been lost over time. Through tailored restoration, conservation practices, proper maintenance, and a management plan suited to a landowner's specific needs, habitat is enhanced and the environment is conserved for future generations.

Forestry

LLM provides a diverse range of forestry services. Some of LLM's specialties are complete forest management, timber inventory and cruising, harvest planning, timber sale layout, contract management, and road design.

Fire Prevention

Reduce your risk of forest fires by having LLM develop a fire prevention strategy specific to your property. LLM can design and execute plans to manage your lands helping to prevent a catastrophic fire from destroying your property and putting your life at greater risk.
